

VEHICLE DYNAMICS AND CONTROL- VI Grade Lab

a. ARB

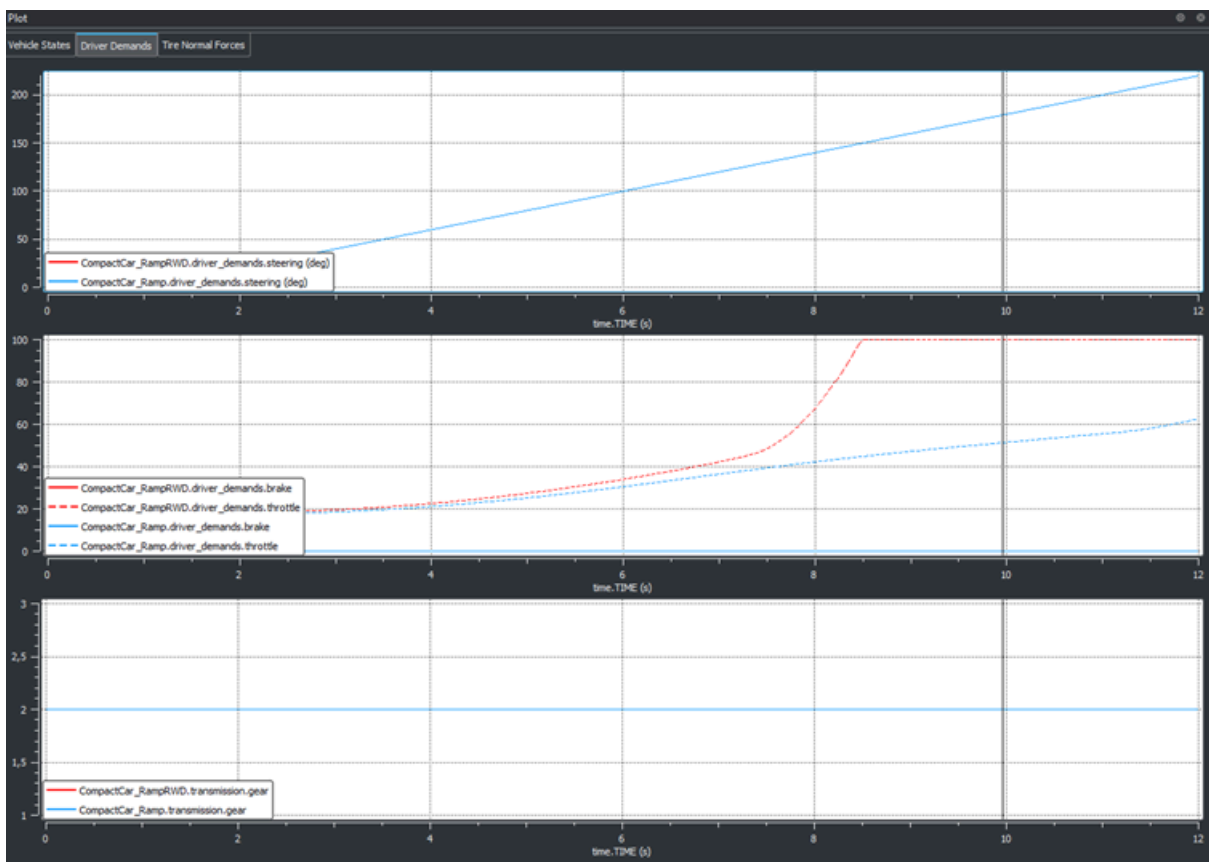

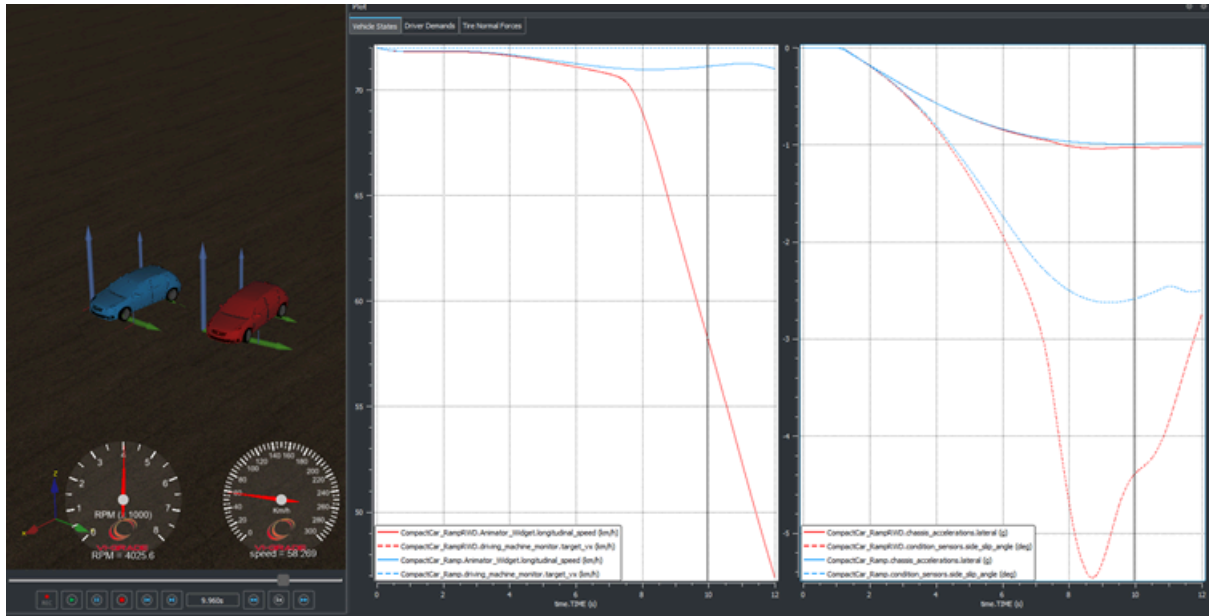

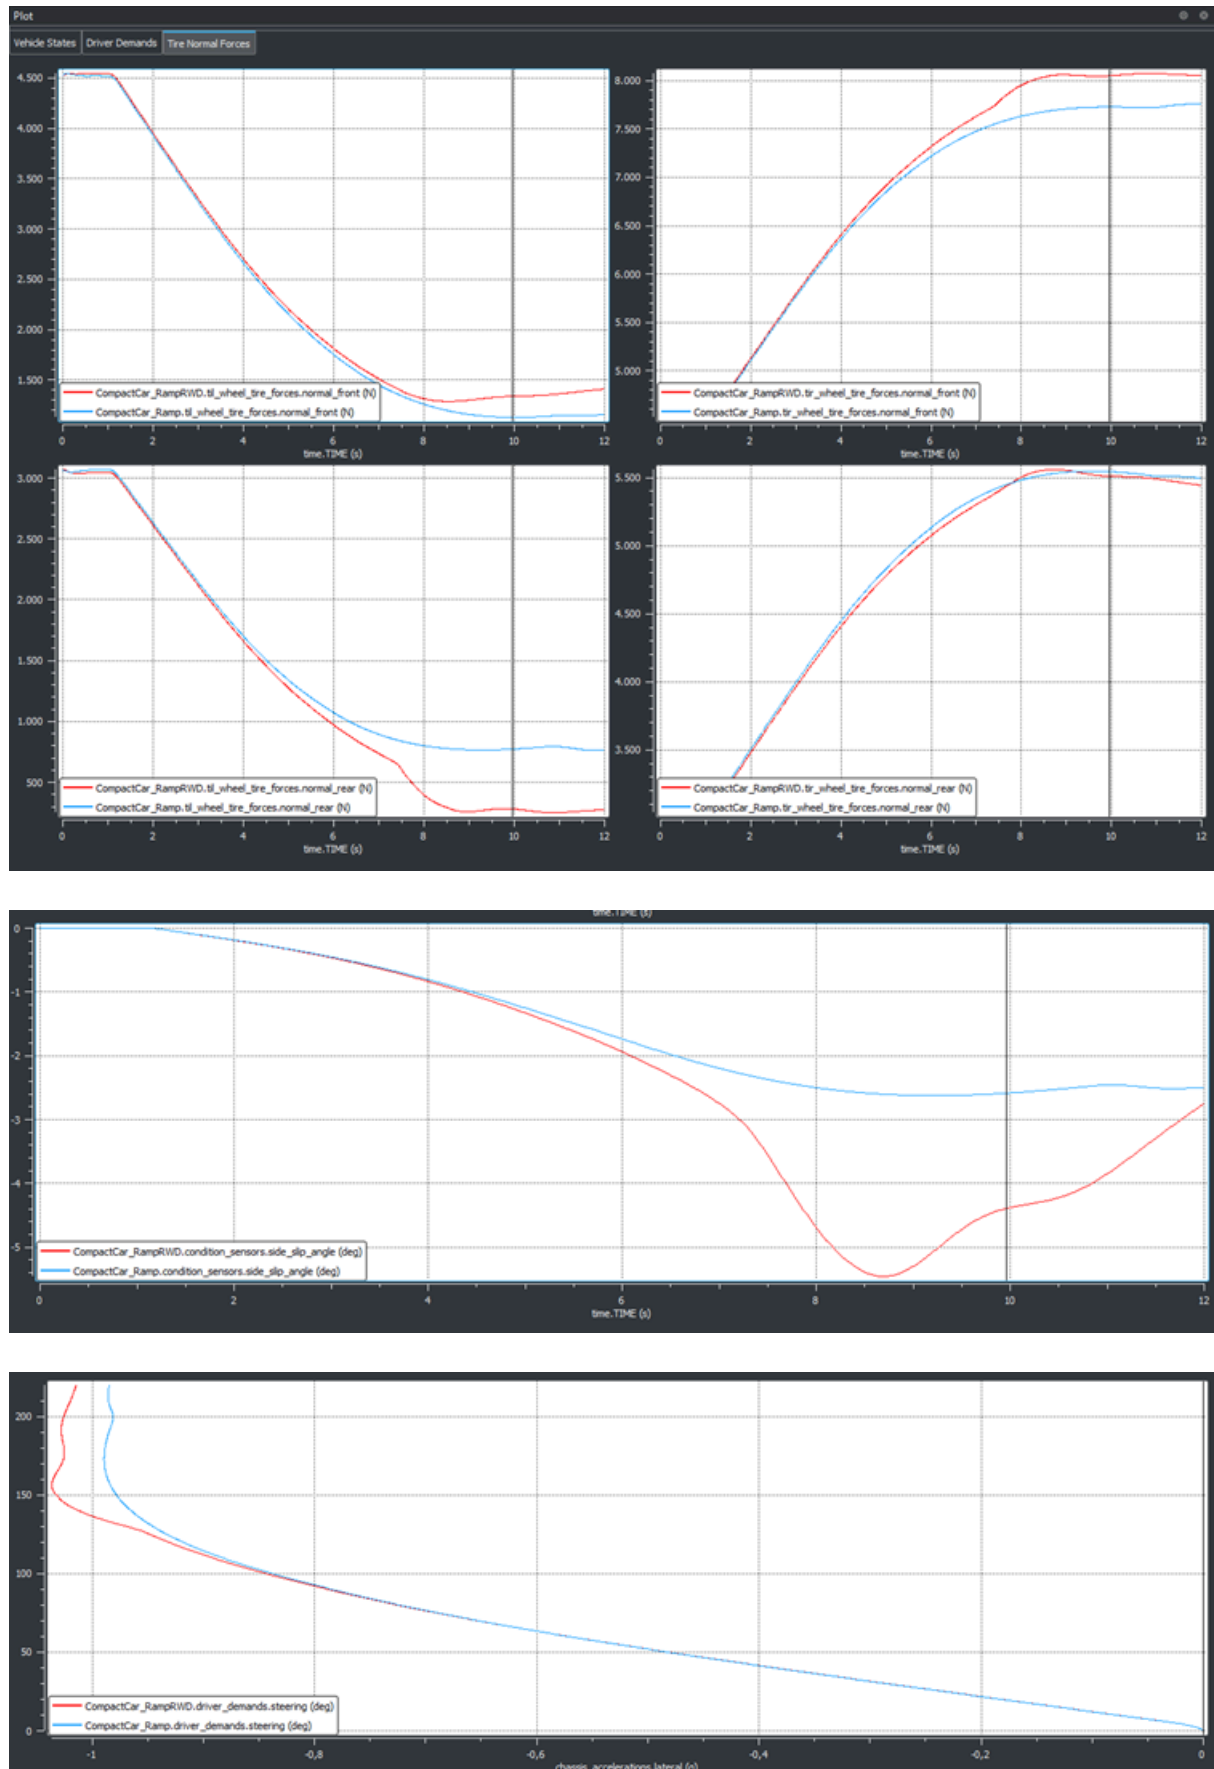

The effects of changing the ARB stiffness are studied.

b. POWERTRAIN

Red FWD Blue RWD

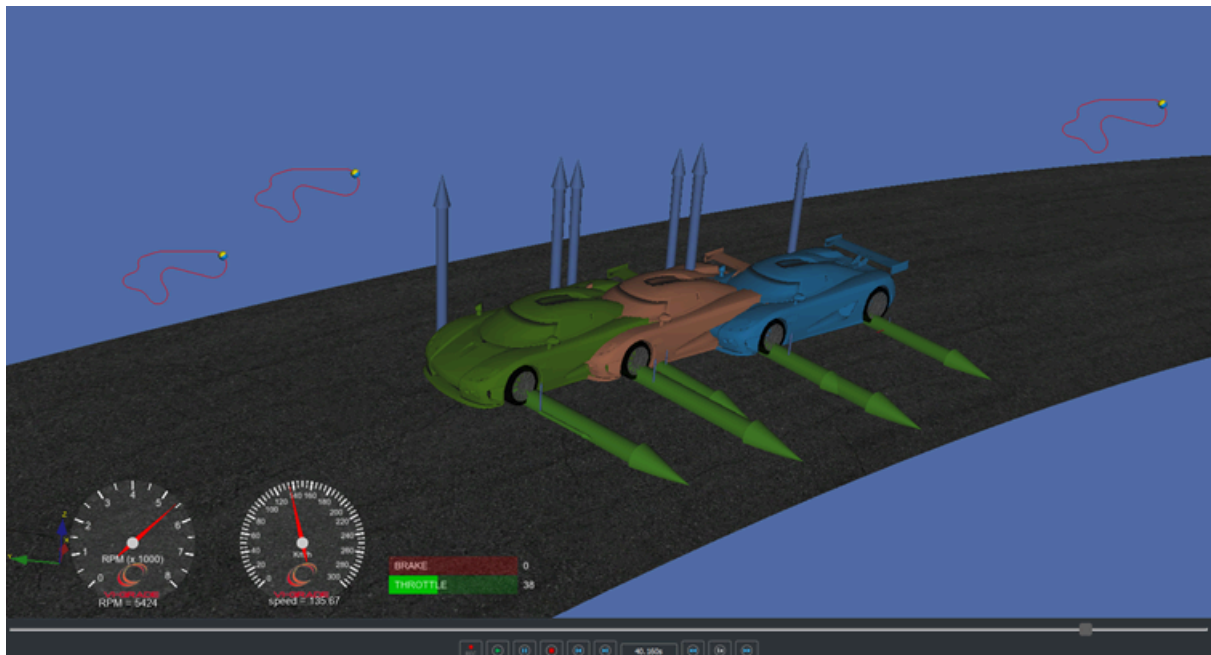

In this section, the effect of a FWD vs RWD powertrain is studied.

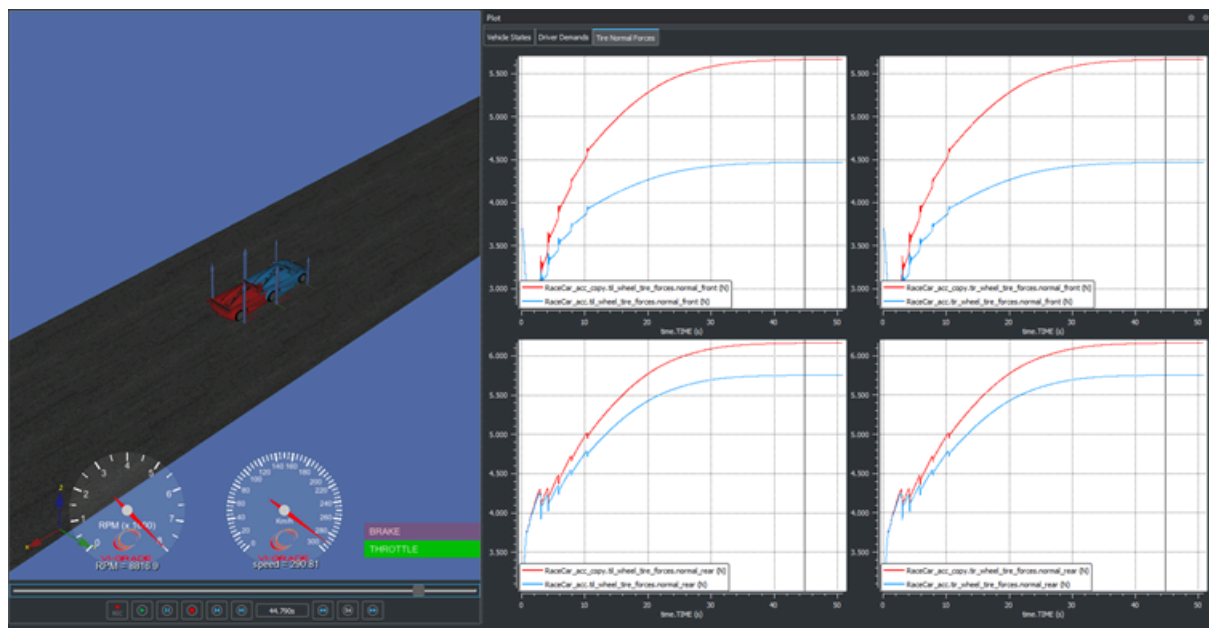

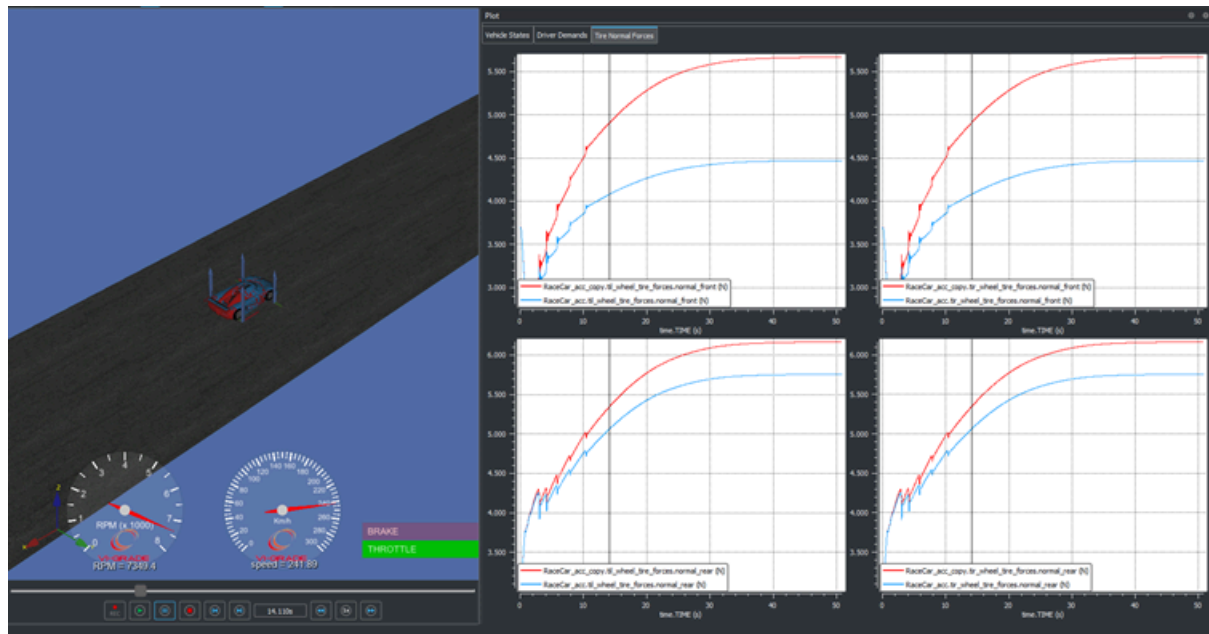

c. Aerodynamic Tuning

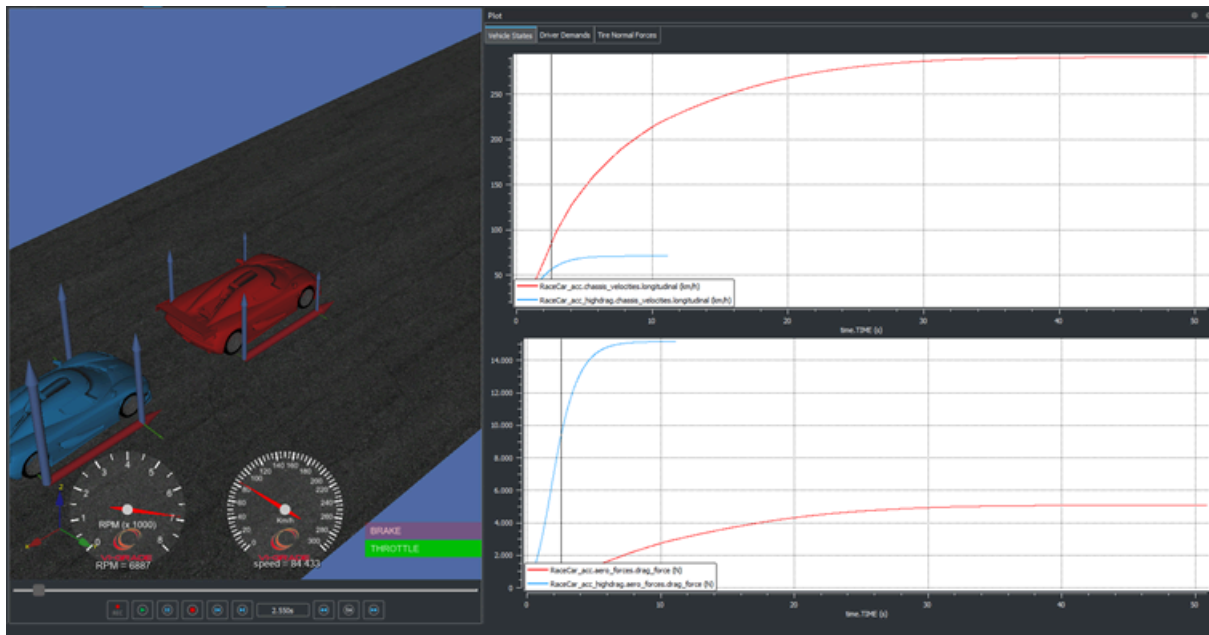

The effect of changing the aerodynamic coefficients is studied.

e. Acceleration

The effect of aerodynamic parameters are studied and how they affect straight line performance by increasing the powertrain load due to increase in drag.
